XYClone™

**Still Searching for a
Safe, Easy, and Reliable Zona Drilling Method?**

Introducing the “Mercury Free”

XYClone™

Zona Laser Drill

Bovine embryo images captured on XYClone

Without XYClone

With XYClone

- ▶ Reliably, quickly, and cleanly opens the zona for stem cell excision from blastocysts, nuclear transfer, and ICSI
- ▶ Plug & Play - simply turn it on and you are ready to go
- ▶ Requires no special needles
- ▶ Compact laser unit installs directly on turret, leaving both the fluorescence and filter cube ports free
- ▶ Installs on any model of inverted microscope, including older models
- ▶ Simple software requires little training
- ▶ Capture and store unlimited images
- ▶ Class 1 laser
- ▶ Available with desktop or notebook computer
- ▶ Call us toll free at **800.323.0503** today for more info! (or 1.978.921.2050)

Please mention code XYJN03 when requesting info by e-mail or fax.
